PROBLEMS AND SOLUTIONS

Risk in Cryptocurrencies

There are many risks involved in other cryptocurrencies. We understand this and have the skills, experience, and leadership to overcome them.

SMART CONTRACT

While there are many functions in the smart contract code of many other Cryptocurrencies that allow the owners of cryptocurrencies to own valuable assets of the common people and to the detriment of investors, on the other hand in Medcoin's Various important steps have been taken to make it 100% safe from such errors.

Not only Medcoin's smart contract is audited, but all the functions in Medcoin's contract are designed to make Medcoin 100% the most secure digital currency, and Decentralized finance has been made 100% secure for the people.

While keeping this in mind, the ownership of Medcoin smart contract, which is deployed to the Binance Smart Chain, has been Retained so that we can change its functions in the future. In other words, we as founder retained ownership so we could change its functions for integrating with Dapps and add extra layer of security.

THE TEAM

Medcoin doesn't have a CEO, nor is it controlled by any individual, organization, entity, or group, except the founder but Medcoin is the first Digital Currency in the world created for Transactions in Healthcare industry . All the investors who have bought and held Medcoins are the real Medcoin team. This door is open for every investor that he can invest in Medcoin and can count himself as the owner and team in Medcoin.

HOW AND WHY THE INVESTORS OWN THE MEDCOIN ?

Further clarification regarding the Medcoin team

There are many risks involved in other cryptocurrencies. We understand this and have the skills, experience, and leadership to overcome them.

The basic and important role of any cryptocurrency is its supply; the one who has the most supply of the Cryptocurrency is the real owner of the Cryptocurrency. In Medcoin the Investors , founder , shareholders are the real owner of Medcoin, those who invested early will have a huge amount of medcoin supply.The one with most supply of Medcoins actually owns Medcoins.

100% of Medcoins will be bought into circulation in a step-by-step manner keeping in mind the best interest of investors , this will help control the price of Medcoin's and prevent major fluctutations.

Whenever an investor buys any cryptocurrency, his asset goes into the liquidity pool and in return, the buyer is given cryptocurrency coins and according to the principle of demand and supply that is why the value of coins also increases. On the other hand, if someone sells cryptocurrency, the coins sold go back to the liquidity pool and in return, the seller gets the assets back from the liquidity pool. That is, all the assets of the buyers of cryptocurrency go to the liquidity pool and the one who has the most supply is the owner of the assets in this liquidity pool and he is the one who controls the price of the cryptocurrency. This is a very important issue and only Med coin presented a solution to this problem.

Medcoin has a supply of 100 billion which cannot be increased and majority of the supply is owned by founder wallet which will be released gradually into Liquidity pool. 100% excluding investor assets will be donated for sponsoring Medical bills and surgeries of the sick and poor patients.” Real Moto of Medcoin” robin hood of the medical world.

The development team has major share of Medcoin's which will be used to create and deploy DApps for Healthcare Industry, keeping in mind intense GPU requirements for AI apps and web 3.0 apps

www.medcoin.in

info@medcoin.in

The main reason behind Medcoin development is to convince early adopters of medcoin in healthcare transactions for Dapps and secure payments.

The Official Medcoin Website development is complete for promoting marketing efforts in attracting early investors.

You can visit medcoin.in for further updates and press releases

LIQUIDITY

Investors are the sole owners of the assets in the liquidity pool, Medcoin's are Liquidated using pancakeswap investors can visit www.medcoin.in and swap any Crypto with for Medcoins.

Further Liquidity will be added trough Pancakeswap,Uniswap and Dextools

Medcoin (MEN) TRC20

GET STARTED WITH MEDCOIN

A global, open alternative to the Medical financial system

Medcoin brings sound money to the world, Merchants and users are empowered with low fees. The future shines brightly with unrestricted growth, global adoption, permissionless innovation, and decentralized development.

Medcoin uses peer-to-peer technology to operate with no central authority or banks; managing transactions and the issuing of Medcoin is carried out collectively by the network (Blockchain). Medcoin is open-source; its design is public, nobody owns or controls Medcoin and everyone can take part. Through many of its unique properties, Medcoin allows exciting uses that could not be covered by any previous payment system.

WORKS EVERYWHERE, ANYTIME

Similarly to email, you don't need to ask recipients you're sending Medcoin to, you just need their Medcoin (TRC-20) wallet address and then you can transact with them anytime. The Medcoin network is always running and never sleeps, even on weekends and holidays.

WORKS EVERYWHERE, ANYTIME

Similarly to email, you don't need to ask recipients you're sending Medcoin to, you just need their Medcoin BEP-20 wallet address and then you can transact with them anytime. The Medcoin network is always running and never sleeps, even on weekends and holidays.

www.medcoin.in

info@medcoin.in

OPEN TO ANYONE

Nobody controls or owns Medcoin . There's no CEO, and you don't need to ask for permission to use it.

FAST INTERNATIONAL PAYMENTS

Sending Medcoin across borders is as easy as sending them across the street. There are no banks to make you wait three business days, no extra fees for making an international transfer, and no special limitations on the minimum or maximum amount you can send. Like the Internet itself, the network is always on. No transaction is too big or too small. And you never need anyone's permission or approval.

BE YOUR OWN BANK AND HAVE FULL CONTROL OVER YOUR MONEY

Banks can make mistakes, hold funds, freeze accounts, and otherwise prevent you from accessing your own money.

Banks can also decide to block your transactions, charge you fees, or close your account without warning. Medcoin gives you full, sovereign control over your funds, which you can access from anywhere in the world.

A MEDICAL DIGITAL CURRENCY WITH A KNOWN, FIXED SUPPLY

The Medcoin protocol ensures there will never be more than 100 billion coins in existence. Governments constantly print money out of thin air, endlessly inflating the supply and devaluing everyone's savings. Medcoin has a fixed supply and therefore represents sound money.

TRANSPARENT

All transactions are recorded on a global public ledger called the blockchain. The ledger is updated at regular intervals in blocks that are connected to form a chain. This allows anyone to easily see the full history of ownership and helps to eliminate the potential for fraud.

PSEUDONYMOUS

Identities are not tied to transactions. This helps to ensure that Medcoin remains free to be used by anyone, without censorship.

www.medcoin.in

info@medcoin.in

WHY CHOOSE MEDCOIN

Our mission is to amplify your Defi experience

The Medcoin is being launched under the same plan that it will be the first most secure digital currency in the world, which will be used by people from all over the world, for Medical and Research purposes. In which investors or various trading entities, Multinational Companies and Organizations, etc. will use Medcoin as a secure payment system.

Special care has been taken to make Medcoin 100% secure in every way. Its security features make it unique from other Cryptocurrencies.

The security features of Medcoin make it a 100% Decentralized and secure payment system

MEDCOIN'S CORE FEATURES

Medcoin's Security is Permanent

Fully Community Driven & Decentralized Infrastructure

Medcoin is a fully decentralized peer-to-peer electronic system that does not rely on any central authority like a government or financial institution. As such, it represents a fundamental redesign of the very nature of money.

Fixed & Non-Mintable supply

Only 100 billion coins will ever be created. This makes Medcoin's a hard asset, like land or gold, providing an opportunity for people to store value in the digital realm over long periods of time.

Ownership Retained

The Smart Contract has not been renounced so that future updates are possible with integration of Medcoins into Healthcare apps.

www.medcoin.in

info@medcoin.in

Liquidity Assets

Investors are the sole owners of the assets in the liquidity pool, to make Medcoin a 100% secure digital currency.

Developer Wallet

Majority of the supplies are in the Medcoin's developer wallet and its shareholders Medcoin's will be gradually released into circulations.

Control Over Supply

The founder that is the developer's wallet has the majority of Medcoin's to control the price of Medcoin's and subsequent releases into liquidity pools

Control Over Liquidity Pool

No one can influence the price of Medcoin's except the founder because no one owns the supply other than its founder and investors.

Gradual liquidity will be added as planned

Smart Contract Audited

Medcoin smart contract is audited and the ownership has been retained, all the functions in Medcoin contract are designed to make Medcoin 100% the most secure digital currency.

Ultra-low processing fee

Medcoin brings sound money to the world, Merchants and users are empowered with low transaction fee.

Medcoin above-described core features make it both a long-term store of value and a highly effective medium of exchange.

www.medcoin.in

info@medcoin.in

MEDCOIN ECOSYSTEM

What is Medcoin used for?

Thanks to its low transaction fees and fast confirmation times, there will be a growing number of use cases for Medcoin. These range from DApps that integrate Medcoin payments, to social networks and Healthcare platforms that allow you to tip using Medcoin.

There are several use cases of Medcoin, but we will focus on some of the financial-related cases.

INTERNATIONAL PAYMENTS

Medcoin can make international payments faster and cheaper. Since Medcoin is not issued by a central authority and is effectively borderless, you can bypass the several intermediaries needed to process the transaction. Transactions can happen on the same day safely and securely without any verifications by any central authorities, Banks, etc.

ALTERNATIVE BANKING AND WORLDWIDE PAYMENTS

A decentralized financial system democratizes finance and gives the unbanked access to services that a traditional financial institution would deny based on existing standards. In emerging markets, those outside the banking ecosystem are using mobile phones to access cryptocurrencies, as it's a viable alternative to a bank account and a way to protect their money from hyperinflation.

INVESTMENTS

Medcoin has a limited and finite supply of coins, giving it the ability to keep inflation low. This stipulation encourages some retail and institutional investors to view Medcoin as a store of value and invest in it as a form of "digital gold."

LONG-TERM STORE OF VALUE

The total supply of Medcoin's will never exceed 100 billion coins. This is written into the code that defines the Medcoin protocol.

www.medcoin.in

info@medcoin.in

As a decentralized network, Medcoin users ultimately decide how the protocol evolves - and since it is not in the interests of participants to dilute their holdings by changing the protocol, the 100 billion limit will almost certainly remain in place forever.

Medcoin's 'set-in-stone' supply schedule makes it unique among hard assets. By comparison, the supply of gold, although limited, is nevertheless subject to the forces of supply and demand. As the price of gold rises, more gold miners are incentivized to search for gold. This leads to an increase in the supply of gold, which places downward pressure on the price.

HIGHLY EFFECTIVE MEDIUM OF EXCHANGE

Medcoin enables peer-to-peer payments between individuals – just like cash, but in the digital realm. Critically, fees for sending Medcoin typically amount to less than a penny per transaction, and settlement occurs near-instantly, regardless of the physical location of participants. This makes Medcoin useful for not only remittances and cross-border trade, but also for daily transactions like buying medicines. Since the fees and transaction times are so low, Medcoin is also effective for micro-transaction use cases like coin reward for uploading medical reports and bills.

(DAPP & DEX) DECENTRALIZED EXCHANGE

In the future, we will build a decentralized swap and exchange (DApp), where Medcoin will be used as one of the key base assets as well as gas to be spent.
